

SCIENCE VISION & PRINCIPLES

At our school, we are passionate about Science. We carry out experiments and investigations to better understand the world around us. We encourage curiosity and ask scientific questions, using practical resources to support our learning. Our lessons extend beyond the classroom as we explore Science outdoors, and we welcome Science visitors to inspire us. Engaging our parents in our Science learning is important to us, and we use scientific vocabulary to explain and share our findings and evidence.

Science is good at St Antony's when...

We carry out experiments or investigations to understand Science better.	
We can be curious about Science and ask scientific questions.	
We can use practical resources to support us with our learning.	
We find out about the world around us using a range of resources.	
We complete Science lessons outdoors.	
We have Science visitors in school.	
Our parents are engaged in our Science learning.	
We use scientific vocabulary to explain and share our findings and evidence.
